

Glider on Campus Event

Thursday, October 20, 2022
8:30 am - 12:00 pm

The goal of this event is to share the excitement and love of flight with young people and the entire iLEAD Lancaster school community!

*This year, 8th-grade learners are immersed in the Soaring Aeronautic Project which provides the opportunity to understand the basics of physics, explore the impact of flight now and in the past by asking and answering the question:
How does the journey of flight change my perspective?*

These learners will interact with pilots around the aircraft as they move through four stations and also meet a pilot guest presenter. After that, all of our iLEAD Lancaster learners will have the chance to visit the glider and talk with the pilots.

For more information about this project, visit

[iLEAD Student Aerospace Projects](#)

Family members are welcome too!
